Satellite Monitoring & Navigation

## Always connected with your people on the road. TomTom WORK

Many of your employees spend a large part of their day on the road. Efficient planning and clear communication are key for you, your customers and your staff. That's why TomTom WORK has introduced Connected Navigation. It integrates the benefits of knowing where your vehicles are, communicating with your people on the road and precise navigation. With TomTom WORK you are always in contact with your people out there. With one glance at the map on your computer screen, you know exactly where they are. You can efficiently, easily and quickly communicate via text messages and send and receive orders. Drivers can react instantly via the TomTom GO in the vehicle. TomTom WORK also registers all driving times, destinations and routes, and provides you with information required for invoices, tax, and salary administration. With TomTom WORK you will always be able to see the big picture. And with the TomTom GO, your driver's job will become much more enjoyable and efficient thanks to the easy navigation from door to door. Want to know more about TomTom WORK? Go to [www.TomTomwork.com](http://www.TomTomwork.com) or contact Trackit Live Telematics our appointed dealer on **0845 00 66 244**

TomTom WORK Plan your day the easy way

# TomTom WORK introduces Connected Navigation

Connected Navigation = Tracking & Tracing + Navigation + Communication

TomTom WEBFLEET

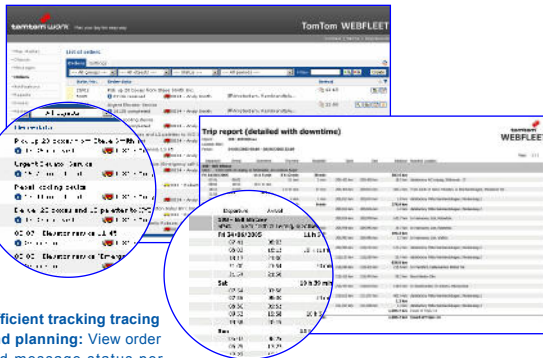

TomTom LINK

TomTom GO

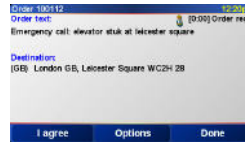

## What do you get:

**Efficient tracking tracing and planning:** View order and message status per vehicle. Receive daily, weekly or monthly reports

**Easy, clear navigation:** Clear 3D maps and spoken instructions guide you from door - to - door

**Two-way communication:** Receive orders from the office via the TomTom GO in the Vehicle

**Professional reporting:** Report working hours and standstill times to the office

## TomTom WORK brings:

**Efficient tracking, tracing and planning:** Know the precise location of all your vehicles as you watch them in real time on street level maps. When a new task comes in, see instantly from people's locations and your current planning which of your drivers is best placed to take the job.

**Easy, clear navigation:** Being navigated straight to the next job makes a driver's life a lot easier and a lot less stressful.

**Two-way communication:** With standard text messaging you can send tasks with navigation coordinates from your pc direct to drivers out on the road. All they have to do is tap "accept" on their TomTom GO and follow the navigation instructions. And when they need support, the office is just a tap on the screen away.

**Professional reporting:** Automatic logbooks of mileage, driving times, standstill locations, etc. Helping you with everything from payroll to expenses, tax returns to efficiency studies. Receive reports daily, weekly or monthly, with exactly the data your company needs.

**Reduced administration and cost savings:** TomTom WORK reduces administration for both drivers and managers. It helps you realise cost saving; e.g. insurance costs, labour costs, fuel costs, communication charges and more.

**Better efficiency and improved customer service:** With TomTom WORK your business efficiency and customer service will improve because you know, at any given time the exact location of your field staff, which allows you to improve response time. You can advise accurate collection and delivery times and send out reports on progress or delays to your customers.

**1 bill, no hidden or unexpected costs.** There really are no hidden costs. Just a monthly subscription price, fixed up front. TomTom WORK is licensed by vehicle not by user therefore as many users can have access to system as required (even customers).

**Do you want to know what TomTom WORK can do for your business? Then contact Trackit Live Telematics on 0845 00 66 244 for an appointment with one of our specialist staff today.**
